

User Manual

1 Installing the game

To install *New Dog, Old Tricks*, please insert the USB Stick given in this box inside of your computer to find a file named **NDOT_Installer.exe**. Double-click to open it, then follow the on-screen instructions to install the game.

2 Utilisation

After launching the game, click on Host to host the game. To play, the second player will have to click on Join and enter the code displayed on the host's screen. Then, click on Play.

When in game, use the WASD keys to move and E to interact with objects. To carry the dog or bark, use A. (QWERTY keyboard)

To access the option menu, please press Escape.

To resolve a puzzle, you can use the levers and the pressure plates that will open the doors. A lever stays awake when activated, but a pressure plate needs weight to stay active.

It is mandatory that both players get through the door in the same time to get to the next puzzle.

Furthermore, the R-key allows you to restart the level, putting every item in his initial state, and the K-key allows you to skip a level and get to the next one.

3 Uninstalling the game

To uninstall the game, head to the parameters of your device and search for the uninstall page. Select *New Dog, Old Tricks*, and it is done!
